Environmental Operating Solutions, Inc. Adds Manufacturing Facility in Jacksonville, FL

EOSi Expands Capacity by Adding Manufacturing Location in Jacksonville, FL

Bourne, MA (May 17, 2011) – Environmental Operating Solutions, Inc. (EOSi) announced today that it has launched a new manufacturing facility in Jacksonville, FL in order to meet increased demand for its MicroC™ external carbon sources. The facility is located within the port of Jacksonville and is served directly by the CSX railroad.

"This new manufacturing facility will improve inbound raw material handling and add significant manufacturing and storage capacity" said Eric Stoermer, President & CEO of EOSi. "We will continue to execute our strategy of building out our nationwide infrastructure to consistently serve customers with our high quality MicroC™ products."

About Environmental Operating Solutions, Inc.:

Environmental Operating Solutions, Inc. (EOSi) provides green chemicals and technical services for biological contaminant removal applications in water and wastewater treatment systems. The company's agriculturally-derived products provide a non-hazardous and environmentally sustainable alternative to methanol or other chemicals. The company's MicroC™ line of products (MicroC 1000 - 4000™) address contaminants including nitrogen, phosphorous, selenium and perchlorate. MicroC™ products are also used as BOD supplements to sustain biomass during maintenance at industrial wastewater facilities and establish biomass for new plant startups. EOSi currently provides more than 400 wastewater treatment plants with a safer, more effective, and environmentally sustainable solution compared with methanol and other carbon sources. In addition, EOSi offers highly specialized technical expertise and support to help plant engineers and operators optimize the use of its products and achieve their effluent performance objectives. EOSi is also engaged in research and development efforts focused on bringing the next generation of biological contaminant removal solutions to the market. EOSi was established in 2003 and is based in Bourne, Massachusetts. For more information, visit www.eosenvironmental.com.
