Environmental Operating Solutions, Inc. Announces Distribution Agreement with Univar USA

Univar USA to Distribute MicroC™ Products in Virginia, North Carolina, and South Carolina

Bourne, MA (May 17, 2011) – Environmental Operating Solutions, Inc. (EOSi) announced today that it has entered into a marketing and distribution agreement whereby Univar USA will distribute MicroC™ products in Virginia, North Carolina and South Carolina. Univar USA is one of the world's leading independent distributors of industrial chemicals and providers of related specialty services, with 2010 sales of \$7.9 billion.

"Univar's reputation for quality and product stewardship is unparalleled throughout the industry. This reputation is consistent with our strategy to become the leading provider of external carbon sources to the Biological Nutrient Removal (BNR) market," said Maurice Gutierrez, Vice president of Sales & Marketing at EOSi. "We look forward to growing our municipal and industrial business with Univar USA and to expanding the relationship to other geographic markets that we serve."

About Environmental Operating Solutions, Inc.:

Environmental Operating Solutions, Inc. (EOSi) provides green chemicals and technical services for biological contaminant removal applications in water and wastewater treatment systems. The company's agriculturally-derived products provide a non-hazardous and environmentally sustainable alternative to methanol or other chemicals. The company's MicroC™ line of products (MicroC 1000 - 4000™) address contaminants including nitrogen, phosphorous, selenium and perchlorate. MicroC™ products are also used as BOD supplements to sustain biomass during maintenance at industrial wastewater facilities and establish biomass for new plant startups. EOSi currently provides more than 400 wastewater treatment plants with a safer, more effective, and environmentally sustainable solution compared with methanol and other carbon sources. In addition, EOSi offers highly specialized technical expertise and support to help plant engineers and operators optimize the use of its products and achieve their effluent performance objectives. EOSi is also engaged in research and development efforts focused on bringing the next generation of biological contaminant removal solutions to the market. EOSi was established in 2003 and is based in Bourne, Massachusetts. For more information, visit www.eosenvironmental.com.
